ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: TRANSMISSION OF COMMUNICATION BETWEEN DATA TRANSMISSION NETWORKS

(57) Abstract: The invention relates to transmitting a communication from a data transmission network (A) to a receiving data transmission network (B). The communication is directed to a transmitting network element (I) in the receiving data transmission network (B) on the basis of this network address. The network address of the network element (I) is queried from a private name server (PD) of the receiving data transmission network, after which said connection is directed to said network element. In addition, the invention relates to a system and a name server for implementing the method according to the invention.
